**RE: ResinTech Filterworks Water Purification Cartridges
Safety Data Sheets**

Dear Customer,

ResinTech has evaluated sealed water purification cartridges manufactured in the Filterworks division of the company. Under the OSHA hazard communication standard (29 CFR 1910.1200) a Safety Data Sheet is required to communicate information concerning hazards and appropriate protective measures. ResinTech Filterworks has determined that manufactured cartridges fall under the "article" exemption of 29 CFR 1910.1200(b)(6)(v).

Under the definition at 29 CFR 1910.1200(c), an "article" means a manufactured item other than a fluid or a particle:

- i- Which is formed to a specific shape or design during manufacture;
- ii- Which has end use function(s) dependent in whole or in part upon its shape or design during end use; and
- iii- Which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical..., and does not pose a physical hazard or health risk to employees.

As an "article," ResinTech is not required to supply a Safety Data Sheet with these products. As with any manufactured article, customers are advised to understand and be aware of their process chemistry and to dispose of the cartridge in a proper manner when depleted if they have been used to filter hazardous substances.

If you have additional concerns regarding the use of these products please consult the ResinTech website and use the customer support options provided.

Sincerely,

Rolf Dinsmore

EHS MANAGER, RESINTECH
