

## SLABKLAMP

Guardrail System

**Yellow Part ID: 70818Y**  
**Blue Part ID: 70818B**

The SlabKlamp simplifies creating secure, OSHA-compliant guardrails on concrete decking. Designed to fit slabs up to 24 inches thick, it provides a fast, reliable solution for protecting workers at elevated job sites. Its versatile design works seamlessly with standard 2x4 boards or wire cabling, making it adaptable to various project needs. Built to last with a durable powder-coated finish, the SlabKlamp withstands tough job site conditions, ensuring safety and compliance.

Whether you're managing a large-scale construction project or a smaller operation, the SlabKlamp offers an effective way to safeguard workers while meeting stringent safety standards.

**COMPLIANCE: OSHA 1910.29 & 1926.502**

## Key Features

- Adjusts for concrete slabs up to 24 inches thick
- Quick-adjustment handle ensures fast setup
- Backup safety pin enhances stability and security
- Works with 2x4 boards or wire cabling
- Durable powder-coated steel resists corrosion
- OSHA 1910 and 1926 Subpart M compliant
