ManoFX[®]

Left or Right Hand Wrist Brace

Indications for Use

Ideal for active patients recovering from fractures of the hand or fingers. Soft breathable body with a wraparound design provides a custom fit. The malleable aluminum stays allow customization to each patient. The split dorsal stay eliminates point pressure on the knuckle.

Product Description

The ManoFX is a wrist hand finger orthosis. The unique design allows fractures of the hand and finger to be positioned for optimum healing. The unique design allows the brace to be configured as a Boxer's fracture splint, Radial Gutter or a Buddy finger splint.

Easy Three Strap Application Three configurations in one brace
