Cabo Elbow

Product Description:

The Cabo Elbow Brace is an elbow orthosis that combines an adjustable range of motion hinge and telescoping arms to insure maximum control of the elbow joint. Available in left or right configurations. Optional hand attachment for additional control.

Indications for Use:

Intended use is to limit range of motion following surgery or injury to the elbow. Ideal for stable fractures, Biceps repair, triceps repair and strains and sprains of ligaments and soft tissue of the elbow.

Features:

- Adjustable straps to fit universally
- Lightweight design for comfort and ease of use
- Allows for controlled flexion and extension ROM hinge features flexion settings from 0-120 degrees and extension settings from 0-90 degrees
- Allows for supination and pronation of forearm and wrist
- Low cost alternative to serial casting
- Washable liners
