

GOAT

Universal Osteoarthritis Knee Brace

Indicated for patients
with knee arthritis

The GOAT brace is a single upright Osteoarthritis brace designed to reduce the pain and swelling associated with Osteoarthritis. The unique adjustment mechanism changes the shape of the brace. That shape creates a gap between the bones.

The easy to apply unique wrap around design creates warmth and compression to reduce the stiffness and swelling in the joint.

GOAT

is a universally sized, low-profile lightweight option for patients with mild to moderate knee OA.

Features:

- Low profile, lightweight, and cushioned neoprene fabric eliminates skin irritation and provides all-day patient comfort
- Compression provides warmth and decreases swelling
- Butterfly hand-dial allows for medial or lateral correction - no tools required
- Allows for a varus or valgus tilt in one brace.
- Single upright hinge to allow further load adjustments
- Universally sized; left or right specific

Common Examples of Use

- Mild to moderate unicompartmental osteoarthritis
- Osteochondral defect procedures
- Meniscal repairs
- Knee Degenerative Joint Disease

Suggested HCPCs L1843 or L1851

Name	Part Number
