**Empower Your Recovery.**  
**Aid In the Prevention of DVT.**

**PlasmaFlow<sup>®</sup> uses compression to stimulate blood flow and help prevent blood clots in the lower limbs.** The leg cuffs inflate by an electric pump that delivers preset compression therapy.<sup>1</sup>

**Aiding in the Prevention of Deep Vein Thrombosis (DVT):<sup>1, 2</sup>** DVT is caused by blood clots after surgery, prolonged immobility, damage to the vein, or inflammation due to trauma.

**PlasmaFlow aids in the treatment of:<sup>1</sup>**

- Stasis dermatitis
- Chronic venous insufficiency
- Reduction of edema in the lower limbs
- Reduced wound healing time for arterial ischemic and venous stasis ulcers
- Diabetic leg ulcers
