

MULTIPLE SMART LOCK CONTROL

The WiFi Gateway is a wireless device used to connect compatible Codelocks Smart Locks to your WiFi network, in conjunction with the K3 Connect App*.

One Gateway can be used to provide control for up to four smart locks within a 16ft range via the K3 Connect App*. The Gateway offers enhanced smart access control by providing remote locking/unlocking, programming, client management, NetCode generation and much more. Simply plug it in, set it up and sync with your locks.
