INSTALLATION

Tools:

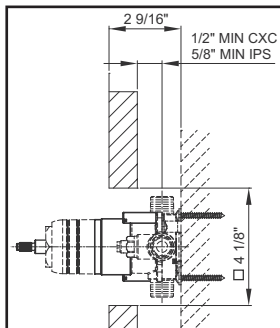

Phillips screwdriver

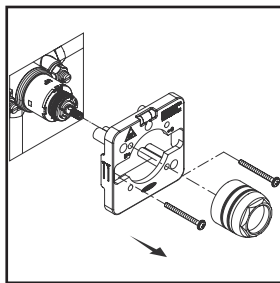

Model Number: OP-440045

Installation Steps:

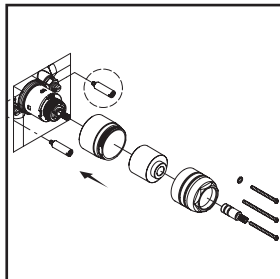

TUB/SHOWER-1" EXTENSION

(1) Proper Securing of Valve: Please follow the detailed valve installation instructions meticulously to guarantee the securement of the valve. This step is critical to the overall functionality and reliability of the system. Verification of Maximum Extension: It is essential to verify the maximum extension required for the correct installation of the valve. This information is integral to the proper functioning of the valve within the designated system. Extension Kit Limitation: Please be aware that the Extension Kit has a maximum extension limit of 1 3/8 inches. Exceeding this limit may compromise the effectiveness and stability of the installation.

(2) Remove Mudguard & Sleeve: Unscrew Sleeve in a counter-clockwise direction. Remove Ceramic Cartridge: Extract Ceramic Cartridge from the valve.

(3) Thread Extension Sleeve: Screw Extension Sleeve into Valve Body. Insert Ceramic Cartridge: Place Ceramic Cartridge into the Valve Body. Ensure the "UP" marking on the cartridge is on the top side. For Back-to-Back Installation, ensure "B-B" is on the top side. Align the cartridge properly with notches in the check valve. Insert Spacer for Extension: Place Spacer above Ceramic Cartridge. Thread Sleeve to Extension Sleeve: Tightened Sleeve onto Extension Sleeve. Ensure to tightened sleeve snugly. Install Extension on Ceramic Cartridge.
