

## SIMPLE, CODE-COMPLIANT, COMPRESSIBLE-FOAM SOLUTIONS FOR BOTTOM-WALL JOINTS

- Code compliance for bottom-wall joints has never been simpler! Choose clean, quickly installed compressible foam for these areas: Hotrod BW for fire-rated assemblies and Smoke & Sound Stop for sound-rated ones.\*
- Installation couldn't be easier – simply compress into the gap between drywall and surrounding structure along the bottom track.
- Unaffected by water, moisture or temperature, these fully cured, preformed solutions remain flexible for the lifetime of the assembly.
- Distinct colors provide easy identification for contractors and inspectors: red for fire ratings, blue for sound ratings. Both solutions available in two sizes: 1" x 1" and ½" x 1" (Hotrod BW sized for 1- and 2-hour fire ratings).
