

Drip Screed Submittal Sheet

STOCK NO.	A SIZE	LENGTH	PCS. PER BOX
540-50	1/2"	10'	15
540-75	3/4"	10'	15

Description: Drip Screeds help keep moisture moving in the right direction. Designed to channel water away from the wall, this screed reduces the risk of staining, cracking and long term damage at the base of your exterior finish. It also functions as an expansion joint, giving walls room to move while keeping finishes protected. The Drip Screed is a smart way to manage moisture and maintain clean, durable finishes.

Advantages: Made from exterior grade PVC. Provides a high impact resistant, rust-proof termination corner.

Applicable Standards: Rigid exterior grade PVC products made by Trim-Tex meet ASTM specifications C926, C1063, C1780, C1861, D1784 and D4216.

Installation: Trim-Tex recommends following established acceptable industry standard installation methods. All butt joints, intersections, and ends should be caulked at the time of installation using elastomeric sealant. When painting Trim-Tex Exterior products, please refer to our painting resources to ensure proper performance and prevent product defects such as warping, oil canning, and buckling.
