

Exterior Control Joint Submittal Sheet

STOCK NO.	SIZE	LENGTH	PCS. PER BOX
EX1558	5/8"	10'	30
EX1578	7/8"	10'	20

Description: Trim-Tex Exterior PVC control joints are critical for managing stress within walls and ceilings, preventing expansive cracking caused by thermal expansion and contraction.

Advantages: Ideal for any surface area over 144 square feet, these control joints feature wide flanges to enhance "keying" of the stucco. Engineered for longitudinal movement, they offer a flexible yet durable solution that maintains structural integrity. Resistant to corrosion and designed for long-lasting performance.

Applicable Standards: Rigid exterior grade PVC products made by Trim-Tex meet ASTM specifications C1063, C1861, D1784 and D4216.

Installation: Trim-Tex recommends following established acceptable industry standard installation methods. All butt joints, intersections and ends shall be caulked at the time of installation.
