

GREENGRIDZ®

DENCON

Dencon offers a desktop manufactured using the innovative Greengridz® construction method, sturdy yet with a marked reduction in both the materials used and its CO2 footprint. Greengridz® has an impressive 60% lower CO2 footprint than a standard MDF board.

As well as its environmental advantages, Greengridz® is designed for ease of use. Its light construction means it is easy to handle, and the expansion bushings on the underside make installing the heightadjustable frame straight forward.

Veneer

HPL (High Pressure Laminates)

Soft HPL

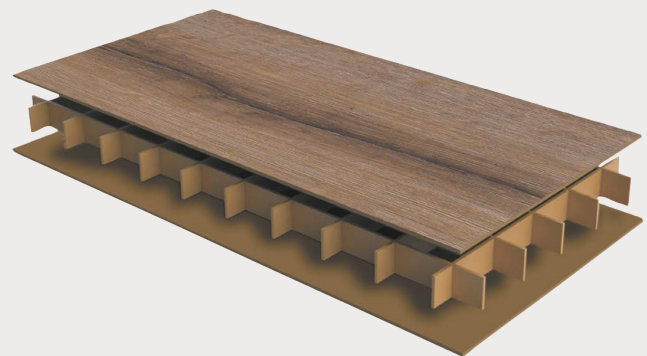

Linoleum colors

Unique selling points

- Strong construction with the Greengridz structure
- Reduced materials consumption and thus saves CO2
- Lightweight plate that is easy to handle
- Danish production of the tabletop
- 10 years warranty and a very high quality
